HARDY GIANT CULTIVATED BLUEBERRIES

Not only does the blueberry produce big juicy berries 2 to 3 times as large as common blueberries, but it is ornamental on the lawn or in the shrubbery border and very easy to grow. The foliage is dark green, long and narrow, blossoms bell-shaped and pinkish white. During the autumn the leaves turn bronze, and during the winter months the twigs are red. The bushes will grow to the height of 8 feet.

For the best results plant on acid soil. Low muck or sand soils are usually very acid. Plant two or more plants to insure proper pollinization. If your soil is not acidity, mix the soil with our SPECIAL IMPORTED PEAT MOSS, see page 48. Set the plant and fill the hole with the same mixture and keep the soil moist.

RUBEL — Early. The bush is upright, very vigorous, hardy and productive. Ships well. Is a producer of large fruit, and a heavy bearer. The winter color of the young wood is a rich red.

JERSEY — Midseason. Bushes grow upright, fruit is extra large and firm, good quality. The winter color of the young wood is a beautiful light red over a gold brown. One of the most popular variety of blueberries grown, the best commercial sort.

GIANT BLUEBERRIES

Just Think! Giant berries, many three-fourths of an inch across. Plump and juicy, sweet and full-flavored. Mild enough to be included in any diet. Fresh ripe berries require no sugar, canned berries very little. Ideal for freezing and very delicious for pies. Every bush is a heavy producer, four bushes in your yard will provide enough berries for pies throughout the season.

We suggest from 5 to 8 plants for a family of five people. Set our hardy plants this year for pleasure and profits. We recommend the larger plants because they will bear more fruit sooner.

JUST A LITTLE GET-ACQUAINTED CHAT . . .

A Few Simple Reasons Why We Sell For Less

You will find that this money saving book is made especially for farmers, home owners, fruit growers and gardeners, giving them a chance to buy better stock for less, direct from the nursery at wholesale prices.

We can sell better stock for less because we are not jobbers or dealers. We own and operate our own farms in the heart of the Michigan fruit belt, our farms are of the best soils for developing good roots, hardy stock that will grow anywhere. We grow a tremendous amount of stock, which is handled only once, direct from our farms to you our many customers.

We sell direct from this catalog only — You have no agents or salesmen commissions to pay — thousands of satisfied customers can't be wrong.

We do not spend thousands of dollars on highly colored catalogs, because it is very costly and makes the stock more expensive, this extra cost must be added to the price of the stock, either in higher prices or poorer quality . . . it is the customer that finally pays.

We have no large, expensive, splashy advertising space, we depend largely upon our friends and our satisfied customers to advertise our stock. These extra savings are passed on to our customers in better stock for less money.

We can offer you good stock for less money because, first of all we have excellent soil, and next we have the latest equipment in up-to-the-minute tractors, automatic sprayers, planters, trenchers, power lifters, loaders, and many other labor-saving devices. All of these combined savings are passed on to our customers in lower prices and better stock.

In ordering your nursery stock needs from Zilke's you are assured of getting stock that is absolutely fresh in every way. Compare our fresh plants and trees with those that are kept in a frosty condition or in storage and in a dry condition for four or five months.

Order direct from Zilke's the grower and see the big difference.

FOR CUSTOMERS WHO LIKE TO CALL AT THE NURSERY

During the shipping and planting season we are open for business 7 days a week, from morning to night. Spring season is from about March 15th to June 1st. Fall planting season is from about September 15th to November 20th, according to the weather conditions.

If you are interested in larger Evergreens, Shrubs or Shade trees than we list in this catalog, see page 17.

We are located directly $\frac{1}{4}$ mile west of Baroda, which is about 9 miles south of St. Joseph, on Cleveland Avenue. Watch for our sign on U. S. 12 Highway, 2 miles North of Bridgman or about 9 miles South of St. Joseph.

WE PAY POSTAGE ON SOME ITEMS LISTED IN THIS CATALOG

Please notice that we pay the postage on such items as bulbs, vines, perennials and strawberry plants, and they are so listed.

There are however some items that are not listed as prepaid parcel post, such as shade trees, fruit trees, roses, shrubs, evergreens and berry plants, because they are listed at such low price for our high grade quality stock that we cannot afford to pay the shipping charges.

For items that are not listed as prepaid see page 50 for shipping information.

In fairness to all of our customers it is impossible to list prepaid prices on every item that we sell because we ship to all parts of the United States.

We will fill your order with the same high grade quality stock regardless of the distance that you live from us, this is the only fair way, in other words "THE ZILKE FAIR METHOD OF DEALING".

A good share of the nursery stock can be shipped by parcel post, including 5 to 6 feet trees. Super size trees can also go parcel post with our scientific method of packing.

Send your order to ZILKE BROTHERS NURSERY the growers and be sure of the best in nursery stock.

ZILKE'S CHERRY TREES ARE BETTER

SWEET CHERRIES

SCHMIDT'S — The Black Giant of Sweet Cherries. A splendid market or home use cherry, because of its attractive and all around good qualities. Considered one of the very best of the Black Sweet Cherries. Delicious to eat, fresh and canned and very attractive. Fruit grows in large clusters. Keeps well and is an excellent shipper. In size it is very large, usually unsurpassed by any black sweet cherry. Bears fruit very young, hardy and a sure cropper. We recommend this variety very highly.

WINDSOR — One of the best quality dark cherries, often referred to as Black Oxheart. Has pinkish flesh and almost black skin. Large, juicy and firm. Delicious to eat, fresh and wonderful for canning. Used extensively for fancy preserving. Tree grows upright and is a rapid and vigorous grower. A good variety.

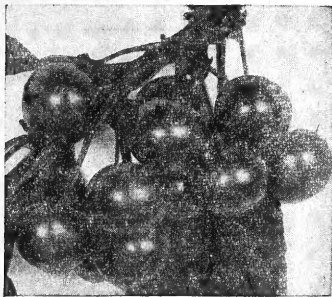

NAPOLEON (Royal Ann) — Of fine appearance and very largest size. Color yellow and amber, with bright red blush; flesh firm, juicy and delicious. Profitable for market, finding a ready sale, for canning and dessert. Ripens in July.

DWARF OKA CHERRY PLUM

The flesh color is a rich, intense purplish black red. It is in all a very remarkable fruit to look at and surely a delight to eat. Jelly and jam made from Oka Cherries are as deliciously sweet as they are beautiful to look at. The Oka tree has a dwarf bushy habit and bears from the ground up.

Dwarf Oka Cherry

But the dwarf size in no way indicates the size of the crop of cherries, for the strength of the plant goes into fruit production and not into surplus tree growth and so consequently the limbs and branches burden themselves with fruit. Plant 2 trees for perfect pollination. 2 year trees, 3 to 4 foot, \$1.50 each, 2 for \$2.85.

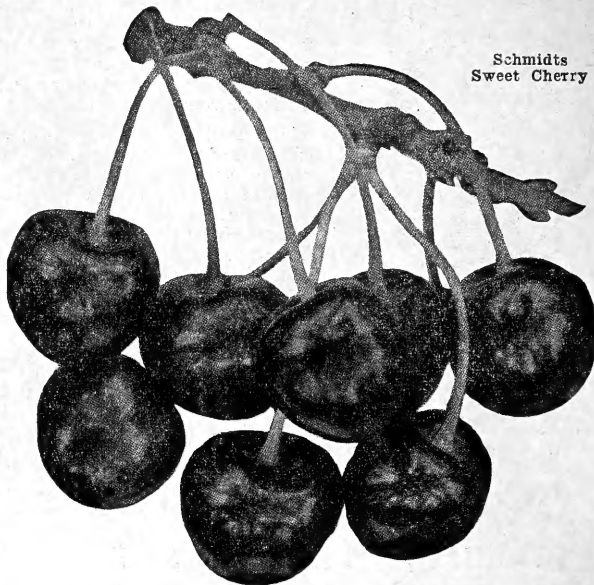

DWARF BUSH CHERRY

Shapely, ornamental shrub, with long pointed gray-green leaves, silvery beneath. Covered with snow-white flowers in Spring. Cherries are in large clusters, easy to pick. Makes excellent jelly, jam and juice. The bushes reach a height of four to five feet and are perfectly hardy everywhere. You will find them beautiful and enjoyable. Bearing age plants \$1.00 each; 3 for \$2.70; 10 for \$7.00.

ELBERTA

There is no other peach which has ever attained the popularity of this variety. It is probably too well known for any lengthy description. However, it is roundish in shape, golden yellow skin with a slightly red blush on the cheek. It is very thickly skinned, which gives it its shipping qualities. It is freestone and a self-pollinizer. Enormous producer.

REDHAVEN

Redhaven matures very early, about a month before Elberta. Fruit medium in size, of slightly elongated shape, and almost completely covered with a brilliant red color. Skin is smooth and tough. THE FUZZLESS PEACH

NECTARINE — A most unusually outstanding and delicious fruit. Resembles a peach in shape, size and flavor. As fuzzless as a plum. Fruit is large, juicy and melting. Unequalled either as a fresh fruit or for canning. Flesh fine grained and a beautiful color clear to the pit.

Destined to become one of America's most popular tree fruits. Has the same habit of growth and bearing as the peach, and requires the same care. The juicy texture and delicious flavor of this smooth skinned Nectarine furnishes one of the most delightful fruits for summer eating. As large as good sized peaches, light skin, overlaid with a heavy attractive red. 3 to 4 foot trees, \$1.35 each, 2 for \$2.60; heavy 4 to 5 foot trees, \$1.85 each; 2 for \$3.50.

ZILKE'S HARDY NORTHERN GROWN TREES ARE BEST

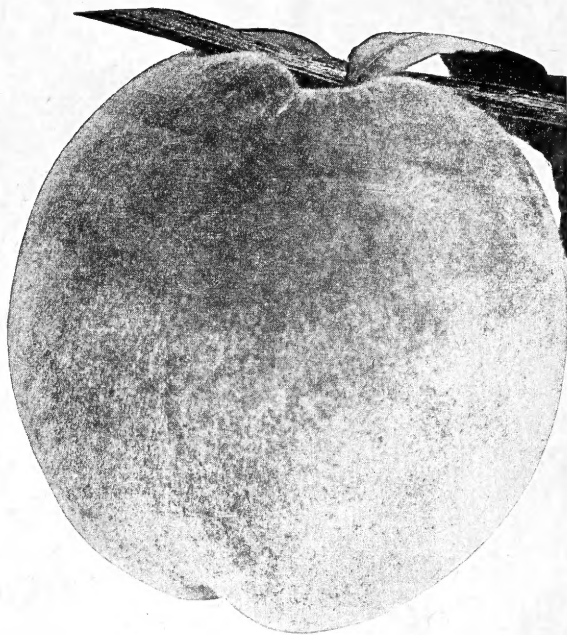

Zilke's Peach Trees are all grown on 2-yr. old roots, well-branched, very heavily rooted. Our buds are selected from the finest orchards and special trees.

This year we are pleased to offer the New Richhaven and New Sunhaven which originated at the Michigan Agricultural Experiment Station by Stanley Johnson.

NEW RICHHAVEN—Richhaven ripens with Halehaven, about 14 days before Elberta, but because of its bright color, it might be picked 2 to 3 days before Halehaven. Fruits are larger than Halehaven, nearly round, and uniform in size and shape. The ground color is bright golden, overlaid with a large, bright red blush on the area exposed to the sun, with stripes of red and gold on the opposite side. Fuzz is so short and soft as to be nearly unnoticeable. Flesh is clear yellow with moderate amount of red near pit. Medium in texture and resistant to browning. Freestone. Excellent for commercial canning. Unusually thick, tough skin adds to handling and shipping ability of fruit. Trees are large, vigorous and productive. Exceptionally hardy.

NEW SUNHAVEN—Very Early! 40 Days Ahead Of Elberta. The success of Redhaven variety resulted in many requests for a variety of this type maturing earlier. Sunhaven is being introduced to meet this need. It ripens very early, 10 days before Redhaven and 40 days earlier than Elberta. Fruit is medium-large in size, nearly round, and uniform in shape. Skin color is much like Redhaven, largely bright red with enough bright golden color for pretty contrast. Short, soft fuzz, almost unnoticeable. Fruits keep and handle unusually well for such an early maturing variety. Flesh is clear yellow, fine-textured, firm, of good flavor and very resistant to browning. Sunhaven is a freestone when fully ripe. Its early ripening assures you of BIG PROFITS for your fruit.

NEW REDSKIN—A new variety that seems destined to become as popular as is Elberta today. A cross between Elberta and J. H. Hale, retaining the good qualities of both parents. Very red skin, hence its name. Fruit large and uniform, yellow fleshed and freestone. Self-pollinating. Juicy and delicious. Excellent for shipping. Ideal for canning or freezing. Bears young; long lived and disease resistant.

Hansen Apricot

NEW HANSEN APRICOT THE SUPER HARDY APRICOT

Hansen's new sensational Northwest hardy apricot. Recently introduced by Prof. N. E. Hansen, of South Dakota State College, who has been working for many years to produce hardy apricots that would be good eating and large size and still would withstand the rigors of Dakota's cold and drought. Two very important points of interest stand out in regard to these new apricots. One is that they are perhaps one of the most drought resistant of all trees, coming through the terrible droughts of 1933, 1934, and 1935 with flying colors—full foliage and no apparent effect whatever from the dry, hot weather, and with a great crop of fruit. The second point is that they are hardy almost anywhere in America, standing and bearing well in climates getting as low as 50 and 60 below zero. Prices: 3 to 4 ft. trees, \$1.50 each; 2 for \$2.85; 4 to 5 ft. trees, \$1.75 each; 2 for \$3.25; king size 5 to 6 ft., \$2.15 each; 2 for \$4.00.

DWARF ORANGE QUINCE

Sometimes called Apple Quince. Fruit large, round with a short neck; color bright yellow; flesh tender, juicy and of excellent flavor. Highly regarded for jellies and preserves. Trees bear young. A good tree to plant on hillsides or where land is hard to work, as it requires very little care. Good 2 to 3 ft. trees, \$1.65 each; 2 for \$3.00.

PERSIMMON TREES

Trees are thrifty growers, will bear fruit in several years. Grows into a small tree, makes a very beautiful and valuable ornamental tree for the garden, street or lawn. Fruit is large, with golden yellow skin, changing to almost red when fully ripe. Fruit will hang on the tree for several weeks after ripe and will keep its fine rich flavor. Prices: Good 2½ to 3 foot trees, 85¢ each; 3 for \$2.40; 5 trees for \$3.75.

Persimmon

Paw Paw

PAW PAW - Northern Banana

A small handsome tree with large purple flowers which are very beautiful and fragrant and large dark green foliage which make it a handsome tree for the park or lawn. Produces large yellow fruit which has the flavor and shape of the banana and is very delicious and attractive. Trees very hardy and productive. Can be grown in all sections of the United States. Should be planted in every lawn. Prices: 2 to 3 foot trees, \$1.65 each; 2 for \$3.00; 5 for \$6.50; 4 to 5 foot trees, \$2.45 each; 2 for \$4.65; 5 for \$10.50.

SHREWD BUYERS APPRECIATE THE SAVING OUR METHOD OF SELLING HAS MADE POSSIBLE

We realize highly colored catalogues printed on heavy glaze paper would be more attractive, however, you all understand that the buyers are really the ones who pay for fancy expensive catalogues. To pay for a big expensive catalogue the quality of the material sold must be lowered or the price must be raised. Shrewd buyers appreciate this.

DWARF EVERBEARING FIG Grow Your Own Large Sweet Figs

If your temperature does not go much below zero in winter then cut fig limbs back to 10 inches high and cover remaining stubs with about 8 inches of dirt, a few leaves or straw will also help. Do this in the fall before frosts, remove protection in the spring after danger of frost is over. The fig plants grow very rapidly after protection is removed, often growing to a height of 7 feet in one season. The fruit is produced on the 1 year wood. HARDY DISEASE RESISTANT NUT TREES

PAPER SHELLLED CARPATHIAN ENGLISH WALNUT

FAMOUS HARDY CORSAN STRAIN

This hardy tree is growing in many parts of the world; the hardiest is found in Russia, Poland and Northern Carpathian mountains where the winter temperature at times drops to more than 40 degrees below zero.

It was from these countries that the original stock was brought to Canada about 20 years ago, and since then has been propagated in Michigan.

The trees have a gray colored skin, leaves are large, glossy and nicely scented. Nuts vary in size from that of the California English walnut to twice this size. Nuts fall free of hull. The shell is thin and breaks very easy. In Canada this variety is a heavy producer, grows rapidly, bears at an early age.

A number of years ago the Chestnut blight destroyed the Native American Chestnuts. The U. S. Dept. of Agriculture—after many tests—introduced a type of

Chinese Chestnut not only blight-resistant, but an early-bearer of large, good quality nuts. Trees start bearing when very young, often in 2 to 5 years, and succeed anywhere the American Sweet Chestnut formerly grew;

ZILKE'S NEW RED EVERBEARING RHUBARB

McDonald Rhubarb

ZILKE'S EVERBEARING McDONALD RED RHUBARB—is the finest of all rhubarb. The stalks are giant in size, twice as large as ordinary rhubarb. Bright red color. Very tender and stays tender a long time. It has the richest flavor and also more sugar, therefore requires less sweetening when cooked. It makes the finest rhubarb pies and sauce you ever tasted. The skin is a bright red, but the inside flesh is white, so when the sauce is cooked it has just enough tinge of red to make it look appetizing. It is a tremendous yielder, that is why we call it ever-bearing, because as fast as you pull one stalk another comes up to take its place.

You can use it over a much longer period of time than ordinary rhubarb. The stalks are 18 to 24 inches long, many half as thick as your wrist. Nothing you can plant in your garden will give you more returns than McDonald rhubarb. We recommend it very highly, not only because it is healthful, but because it tastes so good. Lasts a life time. New Paradise Asparagus

**MATURES A YEAR EARLIER—PLANT THIS SPRING
HARVEST FIRST CROP NEXT YEAR!**

For this year we offer this wonderful new variety from the market gardens of California—where only the best is grown. Again we predict that within a very short time Paradise will have supplanted all other kinds, and will be the standard market and commercial variety in all sections. It is similar in appearance to Mary Washington, and was developed as a sport of that variety by an asparagus grower in Southern California. Stems are large, same color as Mary Washington.

The opportunities for a quick profit from Paradise are now greater than ever before. With America calling for increased production of all food stuffs, canners are demanding greater and greater supplies. Paradise fully meets their requirements, being especially suitable for both canning and freezing under new process.

BEARS ABOUT 40 DAYS AFTER PLANTING

The last degree in production for perfection, size, bright color and good flavor.

The New Superfection is a tremendous bearer, in fact it is our belief that there has never been and probably never will be another Everbearing Strawberry that even approaches Superfection in qualities that make for perfection.

BIG PROFITS — 2 CROPS A YEAR. Plant this spring—pick all summer—you'll get back the price paid for the plants, and most important, a big profit besides. You'll harvest another fine crop the following June—two crops in one year. Unlike most everbearers, this variety is an excellent plant maker.

The plants are very healthy and vigorous, producing an abundance of runners, which bear fruit the first season. A couple of rows across your garden will give you lots of berries.

Berries are large, bright red, firm, roundish in shape, rather tart but good flavor and quality. For preserves and freezing they are excellent, because they hold their shape and color. Good for dessert or culinary uses. Very attractive in appearance and sell well on the fresh fruit market. Prices: 25 plants for \$1.75; 50 for \$3.00; 100 for \$5.15; 250 for \$9.25; 500 for \$16.45. 20TH CENTURY

A new everbearing strawberry that has both eye and taste appeal, plus being a top producer of big red, honeysweet berries of excellent quality.

Never has a strawberry become so popular as quickly as 20th Century. The reasons are simply that it produces so heavily big red berries of fine flavor.

The berries are round, of exceptionally large size from the first picking to the last. The fruit is uniform in size and has a rich red coloring all the way through, is very firm and solid, making an excellent distant shipper. The rich sweet flavor is of the best—really honeysweet, retains this delightful flavor when frozen. A berry of superior quality for freezing, jams and jellies.

Plus being a top producer, it starts bearing in 60 days after planting and continues until frost stops it in the fall. Its yields are very heavy, as has been indicated by its record producing from July to November. Will grow in any soil or climate, also makes a good fruiting row. We recommend this new variety for your garden, you will be more than pleased. Prices: 25 plants for \$1.95; 50 for \$3.50; 100 for \$6.45; 250 for \$14.45; 500 for \$28.50, Postpaid.

NEW RED RICH EVERBEARING STRAWBERRY

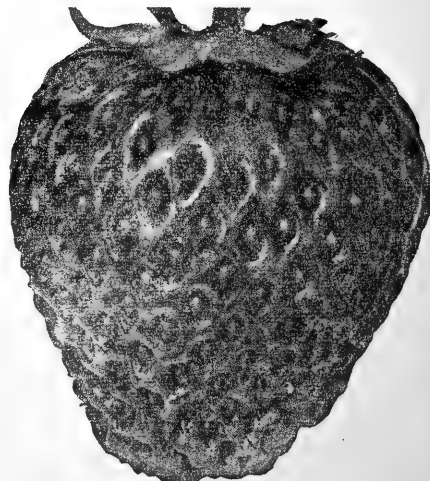

RED RICH UNSURPASSED FOR FREEZING

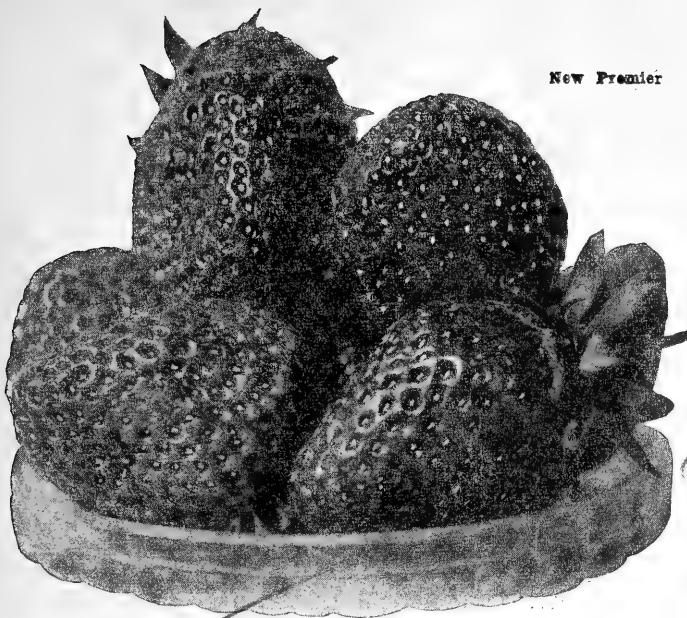

Unsurpassed for freezing, RED RICH is a deep red clear through. It possesses an abundance of natural sugar—less of yours for preparation. Solid and firm, RED RICH holds its natural eye appealing qualities when thawed—it won't mush up. Too, it makes a better dessert or preserve because it is big and red and sweet.

Even in its earlier development a one acre planting of RED RICH yielded 4,000 quarts the same season it was planted. And in a second year RED RICH produced a June crop in matted rows from June 6 to July 6, like a June bearer, and then came through with a heavy yield in August, September and October to more than double the first year's crop. The crown and root system are exceptionally large as well as the leaves. It is a rugged, disease resisting plant that will produce outstanding yields.

Prices: 12 plants \$2.95; 25 for \$4.45; 50 for \$8.45; 100 for \$14.45; 250 for \$32.50; 500 for \$59.95; 1000 for \$115.00. Postpaid.

ZILKE'S NEW 'BLACK MAGIC' EVERBEARING BLACK RASPBERRY

You may have heard of

EVERBEARING STRAWBERRIES

OR

EVERBEARING RED RASPBERRIES

or perhaps, even

EVERBEARING BLACKBERRIES

But have you ever heard of an EVERBEARING BLACK RASPBERRY? Well it's here now, ZILKE'S HAVE IT and it's really a BEAUTY.

The "Black Magic" Everbearing Raspberry ripens early, it starts to ripen with the well-known Early Logan variety. After the summer crop is picked, Black Magic begins producing on the tips of the new canes and side branches, Black Magic not only has fruit on the tips of the new wood, it develops side branches, which are also helps in extending the fruiting season. Black Magic starts with the earliest black raspberry and from there on in until fall or freezing weather it has ripe berries, green berries and blossoms all at the same time.

BLACK MAGIC IS VERY HARDY

This new Black raspberry was found in the high altitude of West Virginia. Its origin at this high altitude would assure its being winter hardy and capable of thriving throughout the northern part of our country. We have fruited Black Magic in the state of Michigan for the last seven years, without winter injury to the plant or the crop.

BERRIES ARE GOOD IN SIZE AND QUALITY

The summer crop of berries are about the size of Cumberland, the fall or everbearing crop is larger than Cumberland or Logan. The canes are very vigorous and productive. Most of the berries are about $\frac{3}{4}$ of an inch in diameter when ripe. The fall crop is larger in size than the summer crop. Price: 1 year No. 1 plants, 6 for \$2.75; 12 for \$4.75; 25 for \$8.45; 50 for \$14.45; 100 for \$22.45; 250 for \$48.45. FOR BEARING AGE PLANTS SEE PAGE 22.

THORNLESS BOYSENBERRY

OFTEN BEARS FRUIT 2 TO 3 INCHES LONG

This is the extra ripening strain of Thornless Boysenberry with canes as smooth as a grape vine. RIPENS ABOUT TWO WEEKS EARLIER THAN BOYSENBERRY. The introducer claims even heavier yields from this Thornless Boysenberry than the common Boysenberry. This new strain Thornless Boysenberry is identical to the Boysenberry except that there are no thorns and it ripens earlier. This is a good feature as the early berries bring much more money. The Thornless is as hardy, rugged and heavy bearing as its parent the Boysenberry. Vines grow long, and this pretty apple-green vine loaded with giant purple beauties is a sight you will never forget, and after you taste a handful of them, other berries will go begging for a while. Delicious with cream and sugar, and when made into jam, it's the last word. Price: 1 year No. 1 plants, 6 for \$1.00; 12 for \$1.45; 25 for \$2.50; 50 for \$4.50; 100 for \$8.45; 250 for \$19.25; BEARING AGE TRANSPLANTS, 3 for \$1.20; 6 for \$2.10; 12 for \$3.50; 25 for \$6.10. FOR KING SIZE PLANTS SEE PAGE 22.

In some orders there are trees which must go express, and also some stock which would ordinarily go by Parcel Post. In order to avoid making two separate shipments, we send the entire order by express. For this privilege we will include extra stock which has a greater value than the amount of the extra transportation charges. When selecting this extra stock for you, we choose items that fit in with the other items on your order.
